SUMMARY

Building innovative applications through code and data has been the focus of my learning journey. I have developed projects in Machine Learning, Data Analysis, and Full-Stack Web Development using Python, SQL, NumPy, Pandas, Matplotlib, Seaborn, Flask, HTML, CSS, JavaScript, and PostgreSQL. I enjoy converting real-world problems into efficient, user-focused applications while continuously enhancing my knowledge through project development.

EDUCATION

Bachelor of technology (CSE)

2022-2026

Siddharth Institute Of Engineering And Technology, Puttur, AP.

CGPA: 7.53/10

Intermediate – MPC

2020-2022

Himaja Junior College, Puttur, AP

68.4%

Secondary School

2019-2020

Himaja E.M High School, Puttur, AP

98%

TECHNICAL SKILLS

Programming: Python, Java Script

AI/ML: Machine Learning, Ensemble learning, Deep learning

Frontend: HTML5, CSS3, JS, Tailwind CSS

Libraries: Numpy, Pandas, Matplotlib, Seaborn

Backend: Flask

Database: PostgreSQL, DBMS, SQL

Manual Testing: SDLC, STLC, Agile Methodology, Test Case Design, Defect Reporting

MS Office

Tools & Platforms: Git, GitHub, Netlify, Render, VS Code, Colab

PROJECTS

- **Cracking Crypto Crime (Best model Analysis): Using AI & Ensemble Learning for Bitcoin Fraud detection:** Developed and evaluated Ensemble Learning models for Bitcoin fraud detection using blockchain transaction datasets. Compared model performance on datasets ranging from 20,000 to 100,000 records and analyzed the best-performing model.
- **Registration-Form:** Developed using HTML5, CSS3, JS for client-side validation. Input fields are validated (email, password, etc.) before submission to ensure correct data entry.
- **Portfolio:** Designed and developed a responsive portfolio website using HTML5, CSS3 and JS implemented mobile-first design and optimized performance for faster loading deployed application using Netlify.
<https://rkso-portfolio.netlify.app>
- **EXPLORATORY DATA ANALYSIS OF ANIME DATASET(EDA):** By using Numpy, Pandas, Matplotlib, Seaborn we performed the anime dataset to analyse the data easily instead of manually.
- **College Ranking System (Ongoing):** Being developed using frontend and backend technologies with a database to store college data. Ranking logic and analysis features are being implemented to generate dynamic results.

CERTIFICATIONS

- Joy Of Computing Using Python – NPTEL
- Web Development Internship Completed Successfully – Assistive Technologies, Tirupati
- Introduction To Psychological Aspects Of Game Design – edX
- Aptitude, Java, My Sql Training – Q-SPIDERS

INTERNSHIPS

Assistive Technologies

January-2024

Successfully completed a Web development internship at **Assistive Technologies, Tirupati**, gaining hands-on experience in HTML5, CSS3, JS.
